21 [Excentric labeling: dynamic neighborhood labeling for data visualization](#) 77%

Jean-Daniel Fekete , Catherine Plaisant

Proceedings of the SIGCHI conference on Human factors in computing systems: the CHI is the limit May 1999

22 [Collaborative conceptual schema design: a process model and prototype system](#) 77%

Sudha Ram , V. Ramesh

ACM Transactions on Information Systems (TOIS) October 1998

Volume 16 Issue 4

Recent years have seen an increased interest in providing support for collaborative activities among groups of users participating in various information systems design tasks such as, requirements determination and process modeling. However, little attention has been paid to the collaborative conceptual database design process. In this article, we develop a model of the collaborative conceptual schema development process and describe the design and implementation of a graphical multiuser c ...

23 [Interaction and modeling techniques for desktop two-handed input](#) 77%

Ken Hinckley , Mary Czerwinski , Mike Sinclair

Proceedings of the 11th annual ACM symposium on User interface software and technology November 1998

24 [Cybcérone: a kiosk information system based on WWW and Java](#) 77%

François Grize , Mehdi Aminian

interactions November 1997

Volume 4 Issue 6

Robbert van Renesse , Kenneth P. Birman , Roy Friedman , Mark Hayden , David A. Karr
Proceedings of the fourteenth annual ACM symposium on Principles of distributed computing August 1995
- 29 Pen computing: a technology overview and a vision 77%
André Meyer
ACM SIGCHI Bulletin July 1995
Volume 27 Issue 3
This work gives an overview of a new technology that is attracting growing interest in public as well as in the computer industry itself. The visible difference from other technologies is in the use of a pen or pencil as the primary means of interaction between a user and a machine, picking up the familiar pen and paper interface metaphor. From this follows a set of consequences that will be analyzed and put into context with other emerging technologies and visions. Starting with a short historic ...
- 30 Marquee: a tool for real-time video logging 77%
Karon Weher , Alex Poon
Proceedings of the SIGCHI conference on Human factors in computing systems: celebrating interdependence April 1994
- 31 Multicard: an open hypermedia system 77%
Antoine Rizk , Louis Sauter
Proceedings of the ACM conference on Hypertext December 1993
- 32 Capturing, structuring, and representing ubiquitous audio 77%
Debby Hindus , Chris Schmandt , Chris Horner
ACM Transactions on Information Systems (TOIS) October 1993

Volume 11 Issue 4

Although talking is an integral part of collaboration, there has been little computer support for acquiring and accessing the contents of conversations. Our approach has focused on ubiquitous audio, or the unobtrusive capture of speech interactions in everyday work environments. Speech recognition technology cannot yet transcribe fluent conversational speech, so the words themselves are not available for organizing the captured interactions. Instead, the structure of an int ...
